5	1) fever 2) weather 3) environment 4) temperature	
	M. Read the passage and choose the best answer. (2.5.Ms)	IV
	There are 22000 types of ants on earth. In a small house of ants you can find millions of ants. In their house you can see strong and bigger ants. They are soldiers and they defend the house against their enemies like snakes or crabs. There are smaller ants that are workers and find delicious food for the family. In their daily lives they carry food to their house to have enough food for cold seasons like winter. These workers also clean the house and take care of baby ants. Ants live all over the earth and you can find them on rocky places a lot. They have a modern system of work and it helps nature to be clean and neat. Their sizes are different and it is wonderful that they don't have nose. They are really powerful. Ants are more powerful than other animals on earth and they can carry things bigger than their	

•	<p>size.</p> <p>These animals can find their ways with special material that comes from their body. They put this material on the earth so they can go to their houses easily. there are much more wonders about these small creations. <u>They</u> make us think more about our God and his creations.</p>
