There are many different opinions about how a person can actually have good health. People used to only think of their health when they were sick. But these days more and more people want to make sure that they don't get sick in the first place. In this article I will describe a few of the most common things that you can do to stay healthy.

One of the best things you can do for your body is exercise. But how much is enough? Not everyone agrees on exactly how much people should exercise each day. Some people think that doing simple things like cleaning the house are helpful. Other people do heavy exercise everyday such as running or swimming. One thing experts do agree on is that any kind of exercise is good for you. Along with exercise, having a healthy diet can help have good health. Foods like vegetables and fruits should be eaten several times each day. It is also important to eat foods high in fiber such as beans, grains, fruit and vegetables. Fiber helps your body to digest the food you eat. It also helps your body in other ways such as decreasing the chance of getting some cancers, heart disease and diabetes. Not eating foods with a lot of sugar, salt and fat is a good idea. Eating these kinds of foods can lead to different health problems. The main one being obesity. Obesity means having so much fat on your body that you are risking your health.

۲۶- Sugar is bad for our health but salt is good. (true/false)

۲۷-There are few ways that can help us have healthy body. (true/false)

۲۸-What is the best thing that we can do to have a healthy body?

.....

۲۹-How can fibers help our body?

.....

GOOD LUCK
