	One day Isaac Newton was reading a book under an apple tree when an apple fell out of the tree. Why did the apple fall? What makes things fall? Newton spent many years answering these questions by thinking and doing experiments. He finally made up the law of Gravity. His law also explained how planets move around the sun or how moons move around the planets. The reason that things fall toward the ground is that the earth we live on is so heavy that it pulls and absorbs things to itself by its great force.		
	۲۸. What law did Newton make?		
	۲۹. What made him think about that law?		
	۳۰. He was doing an experiment under the tree. a. True b.False
