2.5	<p>B: Reading comprehension</p> <p>متن زیر را بخوانید و به سوالات پاسخ دهید.</p> <p>.Read the following passage and then answer the questions.</p> <p>A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'diction' ('saying').</p> <p>There are several types of dictionaries. Dictionaries which explain words and how they are used;</p> <p>dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words.</p> <p>Dictionaries which explain what words mean give a clear 'definition' of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced.</p> <p>There are also dictionaries which translate words into other languages.</p>	L

When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning. A word like "right" has several meanings in English, for example, "correct" and "the opposite of left". A word like "present" may be used as an adjective, meaning "not absent", as a noun, meaning "gift" or as a verb, meaning "give". Words with different meanings exist in other languages, too. A good dictionary lists all the meanings of words to help people find the meaning that they look for.

A complete dictionary also tells you about the origin of words and the story behind them. For example, the words like pajamas, bazaar and paradise entered English from Persian language.
